vpiadn fpvdfn pndf ndf n

### So simple - so smart!

You can do this in the iPredator

- See the overview of gathering Portfolio
- See period reports
- Read messages from debt collection agency
- Call directly to your caseworker

The customer can easily download a free iPredator App from the Apple iStore and connect directly to their collection cases.

Solution handles all security requirements in relation to ICT.  
(Module will continue to support Android smartphones)

### Getting on a mobile platform:

- Order module iPredator
- SPN install the module on your web server. (have you InfoCenter have webserver)
- To give a message to all your customers that they can now download a free app from the iStore
- You add up the customers with a username and password in the module
- Your customers download the app themselves to their iPhone or iPad
- Clients connect to you in a very simple setup in his iPredator app (URL + username and password)

Now your customers follow their collection matters in you own iphone or ipad.
